**EVERYTHING  
BUT THE STOVE**

Contemporary yet stylish, traditional but imaginative; exciting stove furniture that will add that finishing touch to your home.

## Everything but the stove

Euroheat only supply the finest quality stoves. This ethos also applies to our Accessory range, they are without doubt the finest companion sets available. Each range has been designed to make them not just reassuringly practical but actually using them becomes a pleasurable experience.

Euroheat range of fireside accessories and companion sets have been carefully selected not only for their pragmatic ease of use, but their durability and quality. Whatever your need - from a poker or a brush set to a fireguard or fire irons, you can feel assured that whichever you choose will be the perfect choice.

Remember all our accessories can be purchased either from your retailer or online at our web site [www.euroheat.co.uk](http://www.euroheat.co.uk)

## Euroheat plinth range

## Essential, practical and beautiful

The Euroheat glass, steel and cast iron plinth range

The stunning range of Plinths from Euroheat accentuate the quality of all Euroheat products. These are without doubt the finest collection of plinths. Using nothing but the best in materials this range has something for all tastes, from traditional cast iron through steel and ultra modern glass. All come in a variety of shapes and size to perfectly match your stove. For full specification please consult your price list where full ordering details, technical information and prices can be found.

The Firepoint range of axes have been designed and crafted for the professional, using the very best in traditional materials and combining cutting edge technology

**AXE235**  
Vario Splitting Axe 1.5kg German Line, 750mm shaft  
Medium weight splitting axe with wedge-shaped blade for splitting pre-sawn sections.

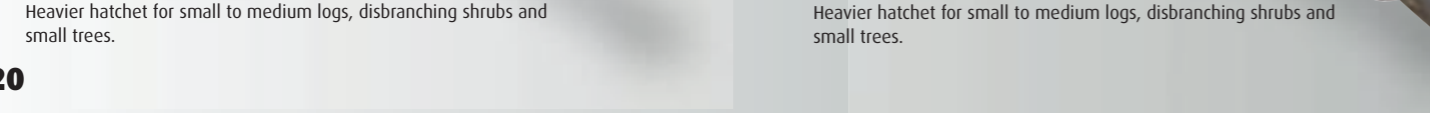

**AXE23SF**  
Forever Splitting Axe 2.3kg, 800mm shaft  
Heavy splitting axe for splitting large logs or sawn tree trunk sections.

**AXE16SF**  
Forever Splitting Axe 1.6kg, 800mm shaft  
Medium weight splitting axe with offset forged blade to prevent jamming in timber.

**AXE08HF**  
Forever 0.8kg Hatchet, 465mm shaft  
Heavier hatchet for small to medium logs, disbranching shrubs and small trees.

**AXE08H**  
Vario Hatchet 0.8kg, 450mm shaft  
Heavier hatchet for small to medium logs, disbranching shrubs and small trees.

## Hickory axes

- **Simplicity**  
The new fixing system does away with complex procedures, making it easy to change shafts.
- **Quality**  
Steel blades hardened to DIN 7287B and Hickory shafts guarantee maximum reliability and long service life.
- **Safety**  
The new fixing system which secures the blade to the shaft prevents uncontrolled loosening of the head.
- **Form**  
The entirely new design breaks away from traditional forms – ergonomic, efficient in use and decorative too.
- **Ergonomics**  
The ergonomic design ensures great striking force, while the perfect balance of form prevents fatigue and guarantees precision cutting.

Quick-change shafts in 75cm and 90cm lengths

Steel axe blade forged and hardened to DIN 7287

Ergonomic HICKORY shaft, varnished

Fixing plate for safety screw fixing and hexagon socket screws with spring washer

## Euroheat ash vac

The Ash Vac is an extremely convenient tool, used for removing ash from your multifuel stove or fireplace. This large capacity, simple to operate, canister system is used in conjunction with your existing vacuum cleaner.

The Ash Vac uses a simple cyclonic principle to keep the ash in the canister, this means your household vacuum cleaner will remain unaffected by the ash removal process, most importantly it will remain clean.

The motorised model removes the requirement of using your old vacuum as it has a built in vacuum motor.

Motorized Ash Vac

## Make life a little easier

Upgrade your stove with a Remote Control

Many Euroheat stove models now have the option of a remote control unit, which can either be fitted at the time of purchase, or in the future, giving you more flexibility and comfort than ever. The remote is either manually or thermostatically operated.

### MS9251

Suitable for the Harmony and Stanford 13, 23, 33, and 43 multifuel stoves.

### MS9252

Suitable for Harmony and Stanford 14,15,24,25,34,35,44 and 45 gas stoves.

### MS9253

Suitable for the IT13 multifuel insert.

### MS9249

Suitable for IT33 and ITH33 stove.

### MS9250 Mains Transformer

Suitable for all Euroheat thermostatic remote control units.

## Perfect burning

The Euroheat Moisture meter is the only way to check the moisture of your wood

### Moisture meter order number AC101

The moisture content of wood for burning should be as low as possible, but certainly below 25%. This is particularly important if you are burning wood in a smoke exempt area in an approved appliance. In this case the wood should be 20% or less. Wood with a moisture content above this will not burn cleanly or efficiently.

- Burning **dry** wood is environmentally friendly, whereas wet wood causes pollution.
- Burning **dry** wood will cost you less money, whereas wet wood reduces the heat available from the wood by up to 80%.
- Burning **dry** wood reduces the maintenance of the stove and substantially increases the longevity of the flue system.
- Burning **dry** wood gives a responsive fire with the finest and most dramatic flame pictures.

### Features

- Battery Check
- Replaceable Pins
- Calibration Check
- Auto Power Off
- Easy to Read LCD Screen
- Measurement Range 6-44%
- Long Life Battery CR2032 x 3
- Shock Resistant Housing

## Season your wood nature's way

The perfect way to store and season your logs

### Log store order number AC1

This log store has been designed to encourage nature to naturally dry freshly sawn timber as quickly as possible. Dependent upon type of wood, diameter and length, split or not split, this process can take anywhere between six and twenty-four months.

Dry wood is a must for any type of wood burning. You must either buy pre-dried timber and keep it dry, or season your own. The log store has been designed in a modular fashion, therefore facilitating both types of approach. One log store holds up to 1.5m<sup>3</sup> of logs, if you are buying pre-dried timber this may be adequate for your needs. However, if you are naturally seasoning larger quantities just join two or more together side by side or back to back. Remember burning dry wood will give you efficient, cost effective heating.

### Features

- Quick and simple assembly
- Modular construction for space utilization
- Felt shingle roof pre-fitted

### Optional

- Option of cedar shingle roof kit AC0002
- Optional Rain shield AC0003

### Standard Tile Roof

### Cedar Tile Roof
